If the Switcher freezes during the Livestream:
- Turn off projectors
- Quit all open programs on both computers
- Turn off power strip
- After 15 seconds turn power strip back on
- Power up both computers
- Go through process when turning on computers and preparing to Livestream
  - Open ATEM
  - Open eCamm
    - Click New
    - Type date into Title (the rest of the information can be added later)
    - Make sure it is set to Public
    - Start Livestream
